

Sunland Leads with

Safety

Our Safety Mission

A primary goal of Sunland's is to eliminate or control both known and potential safety and health hazards that our associates face on the job.

In order to do so, we must adhere to the following guidelines:

Safety and health are a shared responsibility. Everyone from top management to supervisors, to each and every worker must take ownership of his or her own safety and that of their co-workers.

Maintaining a safe and healthy work environment is not just an idea - it is a top priority.

It is everyone's job to spot hazards and to correct them or report them in a timely manner.

Where hazards cannot be completely eliminated, they must be reduced through engineering or administrative controls or, as a final precaution, through the proper use of personal equipment.

Every individual will be trained to perform work safely. Should an individual feel inadequately trained to perform a certain procedure, he or she will immediately discuss the problem with his or her supervisor.

As a condition of employment, each associate must consistently work in a safe manner.
